

## OPTIONAL ICE CUBE ACTIVITY

**\*just for fun\***

To explore our “ice” theme even more, try this at-home ice cube activity! You will need:

\*ice cube tray

\*food coloring

\*glitter or decorating sprinkles

Fill the ice cube tray with water.

Add 2 drops of food coloring into each section.

Add a sprinkle of glitter into each section.

Freeze until frozen.

You can play outside or on a large disposable tablecloth with the ice, talking about the different colors you made. Guess how long it will take to melt! “Draw” pictures on a tablecloth or on paper, with the ice cubes. Experiment with mixing different colors of food coloring to make new colors! Talk about how the cold feels.

Please note, if you use glitter, these ice cubes will NOT be safe for eating. If you want to be able to eat the ice cubes, leave out the glitter or use decorating sprinkles instead!
